Advancing the safety and well-being of animals

Please join our fight to stop the needless suffering of animals, stomp out animal abuse and neglect, and give unwanted pets a second chance at life. Your donations will support vital programs like these:

SHELTER PROGRAMS

SPCA International shows its support at the local level every month by awarding multiple cash grants to needy shelters. This money goes a long way to help the shelters improve their physical condition, enhance their spay and neuter programs, and ultimately reduce euthanasia rates. Cash grants also are available to aid shelters hit by unexpected circumstances – such as natural disasters, theft or fire – that threaten to break already limited budgets.

OPERATION BAGHDAD PUPS

U.S. troops in the Middle East befriend local animals as a way to cope with the emotional hardships they endure while deployed in a war zone.

Yet, it is against regulations for service members to care for an animal or bring it to the U.S. using military resources. Operation Baghdad Pups helps our troops safely transport their companion animals home. It is a logistically challenging program, but it does more than save animals – it also brings comfort, peace of mind and relief to our U.S. soldiers who have served overseas and helps them readjust to life back home after combat.

SPCA ANSWERS

This program serves as a hub for information and as a referral resource for animal lovers throughout the world. *SPCA Answers* connects people with local shelters, helps initiate cruelty investigations, assists animal advocates throughout the world in the fight against cruelty, offers individual support for people dealing with unique situations, and much more.

These are just a few of SPCA International's life-saving efforts.
